184AU c  The decay scheme is adopted from 2005Sa40. It differs greatly from
184AU2c  that proposed by 1978Ne10. Although E|g and I|g data from 2005Sa40 and
184AU3c  1978Ne10 are in satisfactory agreement, there exist a number of
184AU4c  transitions with E|g<90 keV which 1978Ne10 could not detect. Also,
184AU5c  the lowest energy state reported in 1978Ne10 is actually a 68-keV 2+
